

Amergraph Advantage ADV 150

Compact 1200W Metal Halide Exposure Unit

Dependable, cost-effective screen exposures. This 1200-watt, instant-start metal halide print light source features Auto-Optimize® technology that determines the absolute optimum exposure with just one test.

A specially-designed blanket allows for intimate contact with no air strings. The Amergraph ADV 150 features a 20-Channel Scroll Set Light Integrator with Auto-Optimize® technology that eliminates the need to do multiple exposures.

With the AdVantage® 20 Light Integrator/Controller, once you load the frame and press start, fully automatic operation completes the entire process. The ADV 150 exposure unit also features an automatic vacuum release system.

Two-piece design allows unit to fit through 35" wide door opening.

Auto-Optimize® Technology Features

- 10 factory pre-set programs
- Embedded software program in the AdVantage 20 Controller, and a special test target determine optimum exposure with just one test

Advantage 20 Light Integrator/Controller Features

- Touch-activated, user-friendly keypad with LED digital display
- Lithium battery back-up to prevent program loss due to power failures
- Vacuum gauge to inspect vacuum intensity
- Exposure and vacuum set buttons to customize your own programs
- Auto-optimize technology
- Fully automatic operation – load the frame, press start and walk away

Options

- Light shield curtain
- Automatic vacuum drawdown

Benefits

The ADV 150 can be separated into two pieces to easily pass through a small door opening.

Technical Specifications

- Overall Dimensions (H x W x D): 44 x 51 x 44
- Max. Frame Size: 31" x 41" O.D. (78.74 cm x 104.14 cm)
- Power Requirements: 120V, 60Hz, 15A [dedicated power required]; other voltages and 50Hz available

Warranty

- Three-year limited warranty.

Leasing available, please inquire.
