

# Pre-Stretched Screens

High Quality Stretched Screens Made With SAATI Mesh and Adhesives

SAATI is pleased to introduce its new pre-stretched screen program. For the textile printer who needs to focus on stencil production and printing SAATI Stretched Screens are produced with the same high quality SAATI mesh that you are already used to.

White or yellow SAATI Hitex mesh is pre-stretched to SAATI's recommended tension levels on aluminium frames with profiles of 1.5 x 1.5" with a .070" wall thickness and adhered with durable SAATI SB5 Plus polyurethane glue. Standard mesh counts between 86 and 305 are available, some in multiple thread diameters.

## Characteristics

- High quality SAATI textile mesh available in a range of mesh counts
- Aluminum frames that are strong but also lightweight and chemical resistant
- Stretched to SAATI recommended tension levels
- Durable SAATI SB Series polyurethane glue resists tension loss and chemical attack

## Advantages

- Excellent performance screens
- Order in bulk and worry less
- Devote your staff to other steps in the printing process
- Get rid of your old frames and start using reliable SAATI frames
- Recycle your frames at the end of their usable life
